**DETAILED ACTION**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 11-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over (Kiyomitsu (JP-A 2001-059281, English abstract and machine translation) in view of Purnell (U.S. 6,190,440 B1).

Kiyomitsu teaches forming a wallboard of zeolite and gypsum with the zeolite being 10% to 40% by weight (section 006 of the machine translation). The zeolite is used to absorb odors (English abstract). Kiyomitsu does not specify a specific type of zeolite. Purnell teaches using either natural zeolite or synthetic zeolite for odor absorption (col. 2, lines 25-30). The instant invention claims a wall board made of gypsum with natural zeolite for odor absorption. It would have been obvious to one of ordinary skill in the art to have used natural

zeolite in the wall board of Kiyomitsu as Purnell teaches either natural or synthetic zeolite for odor absorption.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Taniguchi et al. teaches using zeolite as filler in wallboard at up to a 50 weight% level (col. 9, lines 35-65).
